

Pounce into a healthy first year

Hill's Science Diet kitten foods use science-led nutrition designed to support the essential building blocks of lifelong health, giving kittens their best possible start in life.

ActivBiome+ Technology

Supports a kitten's gut for the purr-fect poop

Prebiotic fibers support optimal digestion

ActivBiome+ technology is a proprietary blend that nourishes a kitty's unique gut microbiome.

ActivBiome+ supports 5 essential building blocks for a kitten's health

This gut microbiome has been found to impact digestive, skin, coat, organ & brain health.

Specially formulated to have "solid results" (easy-to-scoop poop)

A healthy microbiome ensures that a kitten's digestive system is ready for any adventure.

Antioxidants

10x more Vitamin E than the AAFCO-established minimum

Nutrition that feeds their natural defenses

Vitamins C and E work both inside and outside cells to fend off free radicals.

Immune support through critical growth stages

Our clinically proven combination of antioxidants helps set a young cat's immune system up for success.

Enhance vaccine response from the first bite*

Higher levels of Vitamins C and E have been shown to help extend the body's immunologic memory.

*Response to vaccination (specifically the rabies vaccine) was improved when kittens were fed a food with Hill's levels of AOX. The results showed that animals on high-AOX foods had significantly increased titers, memory cells and serum E concentrations compared to the control (Hill's internal study, 2006)

Every pounce and playtime is supported by Hill's Science Diet, providing essential nutrients for a healthy, happy kitten.
