

URINARY CARE

URINARY NUTRITION THAT'S A STEP AHEAD FOR THEIR BEST LIFE

- 1 Formulated to help dissolve struvite stones
- 2 Reduce the risk of calcium oxalate and struvite stones
- 3 Reduce inflammation from UTIs and stones

SPOT THE SIGNS OF YOUR DOG'S URINARY ISSUES

SIGNS

- URINATING IN THE HOUSE
- PAINFUL URINATION
- URINATING BLOOD
- REPEATED REQUESTS TO GO OUTSIDE

RISKS

- DIET
- STONES OR CRYSTALS IN THE BLADDER
- INFLAMMATION
- INFECTIONS

WHAT IS URINARY TRACT DISEASE?

URINARY TRACT INFECTIONS (UTIs)
Bacteria can cause inflammation, painful urination and bladder stones

STRUVITE STONES
Infection-induced (common) or non-infection-induced (rare) bladder stones lead to irritation and pain

CALCIUM OXALATE STONES
Increased urine saturation levels increase the risk of calcium oxalate stone formation
