

PAWS UP FOR REGULARITY

HILL'S® PRESCRIPTION DIET® **GASTROINTESTINAL BIOME** with ActivBiome+™ ingredient technology

A revolutionary NEW food formulated to promote regular healthy stool and restore the balance of your cat's unique gut ecosystem – the microbiome.

UNIQUELY FORMULATED TO:

- 1** Promote regular bowel movements
- 2** Help balance digestive function
- 3** Support growth of beneficial gut bacteria to maintain digestive health

GREAT TASTING NUTRITION THAT WORKS WITH YOUR CAT'S UNIQUE GUT MICROBIOME

What is the microbiome and why does it matter?

Your cat's gut microbiome is the ecosystem in their digestive tract containing billions of microbes and other microorganisms — including both desirable and undesirable bacteria unique to each pet. By using nutrition to balance the microbiome, you can influence the transition between acute or chronic disease and health.

Gastrointestinal Biome contains new **ActivBiome+**[™] ingredient technology — a blend of active fiber ingredients shown in a clinical study to activate the gut microbiome to support digestive health and well-being.¹
