

Managing Patients during Recovery/Cancer Treatment

FELINE patients during Recovery

Recovery from debility, major surgical procedure or serious injury (e.g., trauma, burns, sepsis, fever, etc.)

Feed Prescription Diet® a/d® Canine/Feline pet food for up to 6 weeks (longer if necessary)

Option of transitioning to Prescription Diet® i/d® Feline pet food until recovery is complete

Recovery from minor procedure or stressful situation

Feed Prescription Diet® a/d® Canine/Feline pet food or Prescription Diet® i/d® Feline pet food initially for 3 days and continue until recovered

Transition to an appropriate Prescription Diet® pet food or Science Diet® pet food
